Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike, prop and spinner significantly damaged. Left wing has a twist and vertical stabilizer and rudder damaged. Fuselage may be bent behind the passenger compartment, significant damage at the wingroots.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was practicing landings on runway 19 to get current to carry passengers. The first full-stop landing was as expected and uneventful. The second landing was as expected upon touch down, the airplane was tracking straight as the tail came down and continue to track straight. After a few seconds of the roll out, the aircraft begin to turn hard to the right, so much so that I could hear the main gear tires squalling. I attempted to correct with left rudder but it was ineffective. The aircraft was on a collision course with runway signage at the second taxiway on runway 19 and I attempted to bring the aircraft under control with the brakes. At this point the aircraft nosed over, prop striking the runway and continued to rotate over and landed on it's back. All flight was in the pattern at KVPC.

I suffered a few scraps and cuts but did not seek medical attention.
