DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☒ Substantial
☐ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Explosion at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wing severe damage to outboard half, left gear bent back, minor damage to right wing, prop strike

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Took off from my fathers (Richard N Kohlhaas) farm strip at [REDACTED] Livermore, IA 50558, flew to the Algona airport, AXA, fueled the plane. My wife Joan M Kohlhaas and my dad were on this flight. After we fueled we were going to fly and look at our crops and departed AXA at roughly 1:30 pm, flew to St Joe where one of my farms is located. As we got to the farm I noticed we were losing RPM's, so I did a mag check with no change in operation, checked prop setting and carb heat with no changes in engine operation. I then started to look for a place to land, I decided on bean field because the beans are very short this year and was not worried about them tangling up in the gear and flipping us over, we landed just fine but the engine was running very rough yet. When I was pulling the mixture out to shut down, when I was just about to idle cut off it started running better. So we decided to at least taxi up to the end of the field and be by the road. Called my brother to come and check out the problem, Jim Kohlhaas, he is an A&P, IA and does the maintenance on the plane. When he arrived approximately 30 minutes later I told him what had happened and he looked it over, pulled the prop through all cylinder compression strokes and couldn't see anything wrong. So he got in and started it up, did a run up with no problems then took it to full power and all checked out good, that is when we decided it was carb icing that had caused our problem. He looked the engine over again and did another runup, again the engine developed full power. We looked over the option for taking off and decided on using the grass CRP. I got in and did another full power run up and all was good. Started my takeoff run, it was running fine, tail came up right away and I lifted off, it settled back down some but I then started to gain altitude again but at that point I was to then end of the field and it was corn to the west and the gear got in the corn and drug me down.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Should have waited for better atmospheric conditions.
Could have made a path for a runway through the bean field.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

**Total Time/Cycles
On Part**

_____ Hours
_____ Cycles

**Time Since This Part
Inspected/Overhauled**

_____ Hours

FUEL & SERVICES INFORMATION**Fuel on Board at Last Takeoff**
(Convert from pounds, as necessary)

70 _____ Gallons
