10:42 A.M., Nampa Airport, RWY 11 7-26-2017

Wind 130 degrees variable 12 - 15 miles per hour (half to three quarter full wind sock).

Aircraft H208SS Cessna A185F

TO WHOM IT MAY CONCERN:

On the above date and time, writer and passenger, Dave Wells, were returning from a Round Robin maintenance observation flight. The approach to runway 11, Nampa Airport was uneventful, with no reported traffic and variable wind sock fluctuation. On approach, writer asked passenger Wells to keep an eye on the wind sock and report any wind change. Although, the wind was switching from left to right and back, touchdown was a normal 3 point landing with a small tire chirp. On roll out writer reduced the flap setting and started to taxi to runway exit. At approximately 10 - 15 mhp, the left wing started to lift up, followed by the tail picking up. Writer held full left aileron and full back pressure on the control wheel. No brakes were being used by Writer, only full left rudder. Aircraft nosed over to the right and stopped. As fuel was still leaking out of the vent tubes, the aircraft lowered and pulled off the runway and to parking.

Writer contacted the Flight Standards District office (Jeff) at 10:48 A.M. on this date.
