NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Student pilot with 45.8 total hours in all in a Cessna 172 and 4.5 hours solo time was practicing landings in the pattern at Manassas. The tower advised the student that she needed to spend minimum time on the runway due to a jet following her. She rushed the landing and was too fast as she leveled off. She touched the nose gear first, bounced into the air, reduced her pitch and struck the runway with the nose gear first again, bending the prop and damaging the firewall and fuselage.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

- Discussion with tower personnel about issuing last second guidance to student pilots during landing - completed
- Improve student training on making timely go-around decisions
