Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage due to runway / ground contact with landing gear doors, propellers, engine nacelles, and belly skins. Potential FOD ingestion on engines, secondary to ground contact. Unaware of any damage other than to aircraft itself.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This memo describes my recollection of the incident at South Texas Regional Airport in Hondo, Texas, involving 1970 SA28-AT Swearingen Merlin IIB aircraft on the registry as N541GF, which is owned by FMG Aviation LLC (referred to throughout as the "Merlin").

In March of 2017, FMG Aviation set forth a plan to train me to operate the Merlin. The plan called for any pilot operating the Merlin to have a current medical, all required ratings, a current flight review, and at least 100 hours of dual instruction and supervised operating experience (including 15 hours of IMC [actual or simulated] and at least 50 take-offs and landings) before operating the Merlin solo. This transition training was being conducted by Mr. D. R. Johnson, MEII, who is a well-known Merlin training specialist, and Mr. Jason Wolnek. To date, I have accumulated 42.8 of flight training in the Merlin, the majority of which with Mr. Johnson. I never operated the Merlin solo.

On Friday 28 July 2017, as part of this training program, at approximately 11.00am I was practicing takeoffs and landings in the Merlin at Hondo. I was in the left seat, Mr. Johnson, was in the right seat, and just behind in the passenger compartment was Mr. Wolnek. I served as Pilot in Command.

During my 55th landing in the Merlin, the aircraft was competing the traffic pattern for runway 17L and was configured to land with gear down but no flaps (a training lesson to learn the Merlin's behavior in a no-flap landing). The Merlin touched down hard, became briefly airborne a second time, then touched down hard again. Subsequently, the landing gear retracted and the aircraft settled onto its belly resulting in damage to the airframe, props, and engines. I was able to maintain directional control of the aircraft throughout the ground skid, using the rudder and limited differential braking, until the speed of the aircraft deteriorated and rudder authority became nil. The nose and right wing of the aircraft then partially departed the runway at a very slow speed. The aircraft stopped. All occupants exited. There were no injuries. There also was no significant damage to property other than to the aircraft itself.

While the paragraph above states exactly what I recall, human memory often performs poorly when remembering unexpected and stressful events. I acknowledge the possibility that, when setting up for a non-standard, no-flaps landing, I may have failed to deploy the landing gear. In such a case, I would have expected to hear (and remember having heard) the gear warning horn, but I do not so recall.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Although I and FMG Aviation had established what I believe to be a thorough plan for my transition training in the Merlin, including a focus on extensive familiarization with the Merlin's systems and flight characteristics, as well as the safe operation of the aircraft, FMG Aviation and I will, along with Mr. Johnson, Mr. Wolnek or other qualified instructors and pilots, review and reassess our training plan for a Merlin or any other aircraft we may operate. We will ensure that we place special emphasis on takeoffs and landings, abnormal landing configurations, and the unique behavior of such aircraft we operate in all stages of flight, ground operations, and emergency/abnormal events and procedures. Our goal is that we learn from this experience and incorporate its lessons in our training and operations going forward.
