Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.					
I met my instructor (Jerry Terlisoner) at the Nampa airport at 10:00am to do a check out ride in the 7AC. I had never met him before and was a little nervous about flying with a man of 265 pounds in the rear seat. The radio was only working intermittently so he wanted to stay in the pattern for touch & goes. The first landing was a bouncer but the following ones were reasonably good. However, the plane was uncontrollable on the ground without power. Full rudder would not keep it on the runway. I had to bring up the power immediately to gain authority on the rudder. After 7 landings, all the same, Jerry wanted to do a full stop where he planned to get out and let me go alone so, the plane could be controllable. the The plane again started off the runway for the grass. Jerry locked up the brakes and the plane went up on the nose, then fell back on the tail wheel.					

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Flying with a man of 265 pounds in the rear seat of a small Taildragger is a recipe for an accident. The plane has heel brakes which cannot be reached when you are applying full rudder in one direction. I had flown less than 100 hrs over the past 18 years but, assumed the instructor could keep us out of trouble. That was not the case.
