Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Complete destruction due to fire subsequent to crash landing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I left PAWS around 1745 local to assess potential landing/camping sites for an upcoming sheep hunt. Crash Location is 61.96133 -153.02374 or west side of Portage Pass in the Happy River Valley near Puntilla, AK. After making a down valley pass at 150-200 feet to assess length and wind direction I attempted a low pass up valley, approx 50 ft AGL 20 deg. flaps 80 mph, to further assess the landing site. Upon crossing the threshold between the willows and creek I experienced a downdraft. I attempted to correct and maintain altitude and entered a stall. Judging my distance to ground and surrounding terrain I attempted to land on the gravel bar. The gravel bar wasn't a viable landing zone due to 12+ inch rocks and multiple one to two foot deep dry cut channels. I was able to bounce on the main gear over the first channel and then attempted to slow the plane by aggressive braking and cutting power. The plane slowly rolled into the 2nd channel and nosed over, staying in a near vertical position. Immediately fuel started flowing from the breather port down the windscreen. I evacuated the aircraft as quickly as possible. By the time I had reached the wingtip and turned around the fuel had ignited. Within 15 minutes most of the fuel had burned, as well as 90% of the airframe.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Making the low pass down valley so no to encounter rising terrain

Making the pass at a higher speed

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
