Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Sunday July 30th at 18:00Z I rented a glider from Miami Gliders. I took Iago Bezerra as a passenger with me for a 2,000 foot flight over and to the west of Homestead General Aviation Airport. After a bit of flying, I set myself up on the downwind leg and relayed that information via handheld radio. I was higher than standard in the pattern because I had encountered quite a bit of lift along the downwind leg allowing me to have room for error. It was not until I had come into a now gusting headwind on final that I encountered the problem. When I noticed I was taken too far out with a slowing ground speed I maintained the best L/D distance speed as closely and as far as I could. As I got closer, it seemed I had just enough height and speed to make a landing just within the airfield. Closer to the airfield, I had encountered a strong low level unexpected headwind gust causing me to slow up 10 KIAS and even more in ground speed therefore then losing my best L/D and sunk about 30 feet. At this point I set up for a safe landing onto the tarp with a slow touchdown speed around 20-15 knots. After the glider came to a halt, my passenger and I exited the aircraft completely unharmed.
