Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to the aircraft was bent/broken spars on the wings from hitting tree (right wing) and pond dam (left wing). Structural damage above the left main wheel strut. Tail and elevator damage from barbed wire fence. Prop struck the mud so potential damage to that which would also mean engine damage, also one of the exhaust pipes was shoved up into the engine. The left door also came off on impact.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

We departed 62K at approximately 1:00 PM and flew over a couple local towns and farms, we then came over our farm to do surveying of a potential runway. On one of the low passes we had a tail wind and while attempting to climb back out we got pushed down by the wind. When I realized we weren't going to be able to climb out we were a few feet off of the ground. I pulled the power and planted the plane on the ground and told Christian to brace himself. We went through two barbed wire fences, hit a tree with the right wing and came to a stop in the pond.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

It's as simple as us going the opposite way. If we did this low pass with the head wind we would have been fine.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
