Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> The aircraft nose cone was damaged, both left and right wingtips had small dent from contacting hangar door, and bent tubing in fuselage near left rear wing attach points. Propeller damage sustained from sheet metal screws in hangar siding. Other property: Hangar had surface damage to corrugated steel panels.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible. The event occurred during a training flight for a tailwheel endorsement. I and the student completed several dual takeoff and full stop landings from the paved runway and adjacent grass strip while remaining in the airport pattern. I exited the aircraft for the student's first solo. Student completed two landings solo and on the third landing on the pavement of runway 25 following an attempted wheel landing the aircraft ground looped and impacted a hangar head on at low speed. Aircraft was secured and pushed back to hangar.
