NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After several practice approaches to taxiway Alpha the student set the aircraft down in order to let the instructor out and to move weight to the storage area under the front left seat. The instructor and student had one last talk about how the aircraft's ~~ECG~~ would be effected. The instructor maintained contact with the student by a hand held radio. After the student ran through the start up checklist and the instructor moved away 50 feet. The student began to pick up the aircraft. The left side came off the ground but the right skid never did. The aircraft rolled over to the right coming to rest on the right hand side. After shutting off the master power and ignition the student exited the aircraft's left door. Emergency services responded quickly.
