Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Front of A/C and landing gear, propeller, both wings and tip of the tail (from flipping over). Windshield cracked and one of the rear window panes. Other areas with moderate to minor damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was doing pattern work at RM Metro Airport starting approximately 1330. I had done about 7 touch and goes and at approximately 1400, as I was approaching 12 R to perform what I knew would be my last touch and go for the day, I landed with a strong crosswind from the right side of the aircraft. If I recall, it was at approximately 220 degrees and 10 knots. I was able to touch down center line, but the wind took me hard to the left and as I used rudder and ailerons to bring me back to the center I over compensated and the aircraft veered sharply to the right and first the right main landing gear went into the grass on the right side of 12 R and then both. I could not bring the A/C back to the runway with rudder and aileron. As I fought to get it on the runway my speed took me over first a blue elevated light and then another elevated white one on the side of the runway. I felt like my best hope was to get back in the air by giving full throttle. I ended up veering back onto the runway and went completely across it and shot off the left side of the runway and down the embankment and continued to the other side of the ditch between 12 R and 12 L. The nose plowed into the upslope on the far side of the ditch and flipped me over onto the top of the A/C.

TERRAIN: Mostly flat and in pattern for KBJC.

DEPARTURE TIME: Was approximately 1320 from the Rocky Mountain Flight School to the runway.

The fire operations unit came to the scene first, then NORTH METRO FIRE. Jefferson County Sheriff Department and the airport operations personnel came to the scene as well.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

It would not have happened if I had been able to control the aircraft on landing in the crosswind.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
