Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wing tip impacted ground and damaged about 3 feet of the wing, not observable prior to take off.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I planned a cross country flight from Davidson County, EXX, to Moore County, SOP, and back on September 20, 2017. Flying in a Cessna 150, N6250T. Departed EXX at approximately 1400, arriving at SOP at 1440.

My trip to Moore County was uneventful, shortly after departing, SOP, I noticed one fuel gauge was registering empty and the other was showing about a quarter tank. At departure from EXX I had sixteen gallons of fuel and had calculated the trip would take approximately six gallons. Concerned about the fuel the closest airport was Siler City, SCR, I landed at SCR at 1515, and had 10 gallons put in.

When ready to depart Siler City the plane would not start, I had to have maintenance connect a battery charger to start the plane. I taxied out to the runway and while holding tried to get the radio and other electronics to work to no avail. After starting my roll for takeoff, at about 1530, I heard a loud noise in my headset which startled me, I looked over at the plane radio to see if the noise had come from there, this distraction caused the plane to veer right and I ended up in the grass off to the right of the runway. I did everything I could to get the plane under control and back on the runway. Once on the runway I stopped and checked the flight controls and the engine, everything seemed to be working fine, and I did not see any damage, so I taxied back and took off to head back to Davidson County.

In route, I decided to land at Asheboro RGNL, HBI, to check the aircraft. It seemed to be flying and running fine, but I wanted to make sure everything was ok. I landed about 1555, checked the flight controls and did an engine run up. Landing gear and everything seemed ok, I did not exit the aircraft because of the starting issue. Departed HBI about 1605 in route to EXX. Arrived EXX about 1625, had the best landing of the day. Taxied to the ramp shut the plane down, did a walk around and other than grass and grass stains did not see any damage. Secured the plane.

I was advised by the plane owner later that evening that there was infact damage to the left wing. The damage was only visible from the top.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

At the instance of the loud noise, I should have immediately shut the plane down and aborted the takeoff.
