NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

12:15 - Preflight N5146R At Hangar 7, Add 1qt oil, Refuelled 48 gallons on board, Contact clearance delivery for flight to M33, M33 2500, information Uniform transponder code 4317

12:45 - Final preflight review, obtain taxi clearance from Nashville Ground, Taxi, Depart runway 20C, Departure heading 110

13:00 - Departure - advise to continue own navigation to M33

13:15 - Advise Departure M33 in sight, frequency change approved squawk 1200, M33 AWOS weather information, wind calm

13:20 - Radio call to M33 traffic, One aircraft in the pattern for runway 17, Entered downwind for runway 17 touch and go.
After taking off and departing from my first touch and go, I reported my position turning crosswind for runway 17, entered downwind, on downwind midfield I engaged my carbheat and reduced power to 1700 RPM's, checked fuel on both, checked undercarriage, mixture rich, double checked power setting, check seatbelt. Added 10 degrees of flaps after my speed was in the "white arc". As I started to descend, I added 10 more degrees of flaps then made a radio call "entering left base"

I was at 1,100 feet and added the last 10 degrees of flaps, then entered final approach, made the radio call and continued my descent. The PAPI indicated I was high so I reduced throttle and pushed the nose over, I observed my airspeed at 80 KIAS and decreased my throttle again, As I entered the base of runway my throttle was at idle. I progress to pulling the yoke back to flare. As I kept pulling the yoke back I kept descending. As I was ready to touch ground. The plane touched ground but bounced up. I worked the yoke to stabilize it, made sure the throttle was closed while trying to keep it on the ground. It almost felt like it was stuck in ground effect and bounced again towards the grass on the left of 17.

The plane rolled into the grass, I pulled the yoke back and applied throttle to get it out of the grass. Once off the grass, I quickly shut the engine down and made a radio call to Gallatin FBO and advised I was ok. FBO towed the plane clear of 17
