Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Nose Gear Collapse leading to a prop strike, minor damage to nose gear, tire, lower cowl and belly

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I made a normal approach to runway 16, weather was clear and calm with no wind. I touched down just past the numbers right on centerline. The mains touched down soft and as the nose wheel began to settle it developed an abrupt left turn tendency. I was unable to compensate on the rudder pedals and we left the runway in a sharp left turn. Right before we left the asphalt I reached over and cut the mixture hoping the prop would stop spinning in case of a nose gear collapse. We went approximately 20 yds off the runway when the nose gear collapsed and there was a prop strike. The Airplane came to rest. I radioed the tower to advise them of my circumstance, while I shut the fuel off and turned the mags off. We exited promptly.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I am undetermined as to the cause of the accident. In doing some research I have found that these airplanes have a tendency to develop a hard turn, (always to the left). I am a low time pilot, however my approach and touchdown was right on centerline.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I am undetermined the cause of the accident, however at the time of the incident nothing appeared to be suspect, outside of the inability to keep the airplane tracking straight ahead after touchdown
