Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Leading edge of right wing has been damaged. It was minor damage, just one part needed to be replaced.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I and my student, Hyungwook, are doing practice for traffic pattern. The weather was perfect for practice, variable wind but not strong. We did 7 T/Os and Landings, and I told Hyungwook to go the last one. Instruction was to stay in left closed traffic for runway 26L. Took off from runway 26L and went all the way to left downwind, the tower gave us "cleared for option, runway 26L", my student read back well. Passing abeam the 26L runway marking, I and Hyungwook suddenly realized a big black bird (it was like a black hawk, but not sure what it was) is coming toward us from 1'o clock. Immediately I took the control and gave bank to the left side, but it was too close I could not avoid it. Got hit by that bird, and I could clearly see that the leading edge of right wing squeezed in, I told Hyungwook to stay out of control to avoid the second incident/accident, in case the controllability or characteristics of the airplane might have changed. I reported to tower that we got bird strike, tower asked me if there's any assistance required, but I said "Negative" cause I thought I could make it to safe landing. Not many changes I felt while landing, and landed safely, we went back to school and reported to chief instructor and IA.
