Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

After tide came in aircraft completely destroyed.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

While departing from the beach a gust of wind pushed the aircraft down faster than I was able to arrest the descent. When we impacted the beach the right was lower and touched first, we bounced off the right wing, up and then struck the left wing, at this point we were going to slow for any recovery and settled into the beach at an angle, we side loaded the left gear, which bent in and the aircraft came to a stop shortly after. Me and the passenger exited through the right side door and walked away from the aircraft, After a few minutes we walked back and unloaded all the gear from the back, and turned the fuel selector off. we moved our stuff off the beach and started to set up camp. At this time the wind started to pick up, the wind was gusting and picked up the right wing and flipped the plane on its back. As the tide came in it further damaged the aircraft by pushing it up and down, I called flight service in DCG and let them know there was no injuries and that we were OK. we departed DCG at about 1300 local and flew to the end of the Nushagak Peninsula and followed the beach around landing twice before

the last departure, we had planned on flying to Kulukak to hunt. The next bay to the west.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

After setting up camp and watching the weather I noticed that even though the wind was not extremely strong the direction it came from was allowing the terrain to create variable gusts and down drafts. In future this may be prevented to take closer look at how wind is impacting the beach.
