NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Left Robertson field near Hartford CT two days ago on a trip to California. Incident occurred at End of the third day, second of 3 legs per day approximately 2 hours per leg.

Circled the field 3-4 times looking for winds, ground traffic. Tried to contact ground traffic and office on CTAF to ask about landing conditions, recommendations. No Answer. Cherokee Aircraft at threshold of runway surprisingly did not respond.

Entered traffic pattern on left hand downwind broadcasting intentions. Turned final and lined up with the centerline at 90 mph aiming for the numbers.

During normal flare past the numbers encountered turbulence at a dip in the runway but flew through this without incident. Touched down 3 wheel landing on center line.

During normal roll-out aircraft experienced sudden and unexpected turn to left similar to being weathercocked. Right rudder applied but aircraft continued to roll off runway. Aircraft left runway at a direction 45 degrees to centerline descending down ward into a ditch and tall grass and nosed over onto its back.

Discussions with local airport personnel revealed that the irregular terrain of trees adjacent to the runway produces dangerous conditions on gusty days such as this. They said that the aircraft appeared to weathercock after passing the line of trees that abruptly ends shielding the runway from some turbulence.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Contacting local ground traffic or office operator on CTAF may have alerted me to gusty conditions. After the incident one airport instructor operator said that on a day like this use of the last 2/3s of the runway is recommended.

Should have used larger airport to the North East. Would have had no problem.
