Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I planned to fly from KMPO to KZER in 22092 Cessna 150, owned by Pocono Mountain Flying Club. Before departure, I checked the weather, checked it again en route, checked the winds aloft, and filled out a navigation/weather log, calculated wind correction angle, and plotted my course on my VFR sectional and determined my compass heading using my E6b. I selected check points on my sectional, including the times of reaching the checkpoints based on my speed. I checked for TFRs, and also checked NOTAMS. I also checked airport facilities directory for information about the airport and services available at KZER. I made traffic announcements prior to entering traffic pattern on the CTAF. When approaching KZER at approximately 6:30 pm today I listened to AWOS which reported weather was fine with wind at 12 knots from 170. Coming in to land on runway 11, there appeared to be very choppy air and potentially wind shear. The identifying lights for the glide path showed one red and one white on the glide path. The AWOS had not reported any gusts. The approach seemed stable and normal. I came in, then at about 20 feet from the ground, there was a very massive choppy wind, including what could have been windshear, updrafts, or downdrafts. I have never experienced this kind of wind on a landing in any aircraft, or had never seen it before. This was at odds with what the AWOS had reported, and the weather brief had not indicated that this might occur.

I touched down on the main gear. At the same time that my main gear touched down, a massive gust blew us onto the grass to the left. I attempted to correct this. The plane was pushed by wind and went to the left side of the pavement and into a ditch to the left of the pavement. On the grass, the plane spun about 180 degrees and came to rest. I and my passenger were uninjured. I instructed my passenger to exit the aircraft quickly. While my passenger was exiting, I shut off the master, took the keys out, and shut the fuel valve handle off. I did not observe any smoke, however I wanted to ensure that all electrics were off and no fuel could flow to the engine. I exited the aircraft and we moved a safe distance from the plane. I then called 911 to report, and also the FBO at KZER. Then help came.
