Vertical Stab. and rudder damage, Engine sudden stoppage engine mount damaged, left wing struts damaged, both wings need recover after inspection (currently waiting on insurance company) cowling's upper and lower destroyed. Currently thats all I can visually see, maybe more hidden.

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

The following is the result of my aircraft accident/mishap from Saturday October 21, 2017 in a Cessna 120 N72552. I departed Warren Field Washington, NC about 1000 inbound for the airport in New Bern, NC KEWN it should have been about a 22 minute flight. The day was a clear VFR day, the winds were calm. About 10 miles out I requested airport advisories from EWN and received information that runway 22 was in use, I'm sure I was also given density altitude and wind information I just don't recall the information at this time. I wanted to do some touch and goes and full stop training since I recently received my tail wheel endorsement and wanted to practice. The first landing was rough so I did a go around after touch down. Then on second attempt I believe I just hit a little too hard and the airplane started bouncing, I tried to recover but could not get control in time and ran off runway, I then notified the tower at this time it gets a little cloudy but I believe I applied breaks and the plane flipped over. I heard the ELT in my head set and at that time I shut off ELT, shut off fuel, and turned off master switch. The crash and rescue arrived shortly to assist. After giving approval to move the airplane, 4 of us flipped the plane over and towed the airplane to my hanger.

**RECOMMENDATION (How could this accident/incident have been prevented?)**

## Operator/Owner Safety Recommendation

Not everybody has the same experience with different type aircraft, but in my case I was a rusty pilot, and trying to get involved with vintage aircraft, especially tail daggers. I felt really confident flying and landing the tail dragger after receiving what I considered excellent training. But due to work and weather I wasn't able to get into a airplane I had not yet had a chance to fly solo (after a recent purchase) I feel that more flying time with a person that is familiar with the exact type and model would have went a long way in avoiding this accident. But its hard to find that person, I did try to find some one. I should have researched allot harder, and took more time finding some one that would fit that mold. Bottom lime more training.
