161003 Jeremy Gardner

On Oct 5 2017. My instructor Eric and I were practicing autorotations.

The winds were calm and ~~and~~ we entered the autorotation @ 75 kts @ 2800 msl, out of the touch yellow. Everything was smooth on the way down. We

trapped our RPMs in the green and maintained 65 kts. About 40 feet

feet from the ground I began my flare by leveling the A/C, and pulling aft cyclic to flare... almost immediately after the middle of the flare,

I thought I rolled on the governor and began giving it up collective.

As we came down we started to approach the ground quickly.

Eric said to roll ^{on} throttle which I thought I was. Hindsight.. I

was pulling up on the collective but my hand(wrist) was locked--preventing

the governor to roll on and increase power. From there, I'm not really sure what happened. We approached ground pretty quick after that.

We touched down level and straight, and spread the landing skids.

I'm declining any medical assistance..

The student and I were practicing auto rotations with power recovery, at the start of the Auto we entered at 2800ft ms1 aiming for taxiway P and K. We maintained RPMs in the green and 65kts through the glide. At 200ft checks we still maintain 65kts and RPMs in the green, we proceed to descend to 40ft I advise the student to begin a baby flare, as we passed through 40ft I advise student to flare more and roll on throttle for power recovery as we descended to 100ft we level the aircraft, as we raised the collective I felt resistance in the collective as we raised up, as we raised collective or the RPMs began to drag down, I tried rolling on throttle to bring the RPMs back up to NO avail. I believe student tensed up on the throttle and collective. As I recognized the RPMs were not coming back, I kept the aircraft level as we made contact and tried cushioning for the landing. Once we came to a complete stop we shutdown the aircraft and checked on the student well being. He advised he is of good health and I also am of good health to which I will decline medical assistance...
