Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

One main rotor blade had an oblong shaped, three inch hole through it.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On this date and time we were performing wildlife anti-depredation operations. We had captured one deer and were working on the second one of the day. We observed a doe enter a clear area of the pasture and made our approach, banking to the left in order to position for net deployment. The doe was between our 8 and 9 o'clock position, and the net gunner made the net shot at the deer.

We then observed the net miss the doe and concurrently heard an unusual sound emanating from the helicopter. Other than the sound, best described as a "whooshing noise," nothing else indicated an unusual circumstance. There was no vibration, drop in rotor speed, or other anomaly noted. We landed immediately to investigate the source of the sound. Looking up at the rotor disk prior to shut down we noted unusual discoloration. Upon shutdown the damage to the blue blade was noted in the form of a large oblong hole on the blade about 2/3 from the hub.

Examination of the net revealed that a weight was missing from one the corners. After observing the damage to the blade and the net, and checking the surroundings, it was agreed that this missing weight from the net most likely struck the blade causing the damage. A search was conducted for the missing weight but it was not located. Note: there were no trees, stumps, or contactable debris in close proximity at the time of the incident.

All necessary personnel were notified and the aircraft was secured. Airbus and the NTSB were verbally notified as soon as practical after the event.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

None at this time. Participating with the NTSB investigative process.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Uncertain if the weight detached upon firing the net.
