NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

In planning the repositioning of 1WC from Lake Whatcom Washington to my hangar at KBVS, I had surveyed the entire area by walking the length of runway 22 on Nov 9th. I also noted the AFD advice that the grass runway, my original intended landing area, was closed from 1 Nov to May. So I then decided that, wind conditions permitting, I would land in the clear zone approaching runway 22, and attempt to stop at the intersection of a gravel driveway and the paved runway 22.

I did note the gravel driveway in my survey, and, from prior similar experience, felt confident that the aircraft would cross it OK even if I should land long.

Alone in the aircraft, after noting the calm winds at KBVS, I took off from Lake Whatcom Washington at about 0640 still intending to land on the grass short of, and to the west side of, the runway 22 threshold.

Approximately fifteen minutes later the winds were still calm on my approach, but I was high and fast, and touched down too far along to stop before the gravel drive. Nonetheless, I still thought I could safely cross the gravel drive. However, when I reached the driveway, the aircraft bounced up and came back down hard on the nose of one float causing a tumble from which the aircraft ended up on its back.

Although there were no injuries to myself, the aircraft was severely damaged including a broken spar and struts in the left wing.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

A go around on the initial approach, in favor of an earlier touchdown point.

Also, a more correct assessment of the possible hazard of crossing the gravel drive in the intended landing area.
