RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Assuming that the cause was inadvertent application of brake by a front-seat occupant, better briefing of right-seat passenger may have helped in this situation.

(Airplane is 2-seat, side-by-side with full dual controls. Brakes are toe not heel). It is possible for a large individual or a heavily-shod individual to apply partial brake with intended rudder input.
