

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location _____ State: FL
Nearest City/Place: Melbourne
ZIP: 32901 Country: USA
Latitude: 28.0836 Longitude: 80.60813
(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 11/16/17 Local Time: 15:00
mm/dd/yyyy Time Zone: EDT

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N5381F
Manufacturer: PIPER
Model: 28R200
Serial Number: 28R-7635462
Year of Manufacture: 1976
Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☒ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

Maximum Gross Weight: 1960 lbs
Weight at Time of Accident/Incident: 1300 lbs

Number of Seats: 3 Flight Crew Seats: 1
Cabin Crew Seats: _____ Passenger Seats: 2

Number of Engines: 1

Category of Aircraft

- ☒ Airplane
- ☐ Balloon
- ☐ Blimp/Dirigible
- ☐ Glider
- ☐ Gyroplane
- ☐ Helicopter
- ☐ Powered Lift
- ☐ Rocket
- ☐ Ultralight
- ☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

- | Standard | Special |
|--|---|
| ☒ Normal | ☐ Restricted |
| ☐ Aerobatic | ☐ Limited |
| ☐ Balloon | ☐ Provisional |
| ☐ Commuter | ☐ Special Flight |
| ☐ Transport | ☐ Experimental |
| ☐ Utility | ☐ Special Light-Sport |
| | ☐ Experimental Light-Sport |
- ☐ Certificate of Authorization or Waiver (COA)
☐ None ☐ Unknown

Landing Gear

(Check all that apply)

- ☒ Retractable
- | | |
|---|------------------------------------|
| ☐ Tricycle | ☐ Tailwheel |
| ☐ Amphibian | ☐ High Skid |
| ☐ Emergency Float | ☐ Skid |
| ☐ Float | ☐ Ski |
| ☐ Hull | ☐ Ski/Wheel |
| ☐ Other Launch/Recovery System | |
| ☐ None | ☐ Unknown |

Engine Type (Select one)

Last Inspection Type

- ☐ 100-Hour ☐ Continuous Airworthiness
☐ AAIP ☐ Conditional Inspection
☐ Annual ☐ Unknown

Date Last Inspection: 11/2/16
mm/dd/yyyy

Airframe Total Time: 3420.8 3981 hrs
hours measured at (Select one)

☐ Last Inspection ☒ Time of Accident/Incident

Type of Maintenance Program (Select one)

- ☒ Annual
☐ Conditional (Amateur-built only)
☐ Manufacturer's Inspection Program
☐ Other Approved Inspection Program (AAIP)
☐ Continuous Airworthiness
☐ Other, specify: _____

Description of Fire Extinguishing System

- ☒ None
☐ Specify: _____

Propeller 1

- ☐ Fixed Pitch
☒ Controllable Pitch
☐ Ground Adjustable

Manufacturer: HARTZELL

Model: HC-C24R-1BFB/F7497

ELT Installed: ☒ Yes ☐ No

If Yes:

ELT Manufacturer: ACIC

Model or Part No.: 406

TSO No.: ☐ OC91 (121.5 MHz) ☐ OC91a (121.5 MHz)
☒ C126 (406 MHz)

Was ELT still mounted in aircraft? ☒ Yes ☐ No

Was ELT still connected to antenna? ☒ Yes ☐ No

Did ELT Activate? ☒ Yes ☐ No

If activated:

Did ELT Aid in Locating Aircraft: ☐ Yes ☒ No

If not activated:

- Indicate Reason: ☒ Not Needed
☐ Impact Damage
☐ Fire Damage
☐ Battery Expired/Damaged
☐ Unknown

Propeller 2

- ☐ Fixed Pitch
☐ Controllable Pitch
☐ Ground Adjustable

Manufacturer: _____

Model: _____

Additional Equipment (Check all that apply)

- ☐ ADS-B
☐ Airframe Parachute
☐ Angle of Attack Indicator
☒ Autopilot
☐ Data Recorder
☐ Electronic Flight Bag or Handheld Device

Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

NOSE AND FRONT LANDING GEAR ASSEMBLY AND TIRE SEVERELY DAMAGED WHEN PLANE TOOK A DRAMATIC LEFT TURN OFF RUNWAY ON ITS OWN AND TAXIED INTO DITCH RUNNING PARALLEL TO RUNWAY. LEFT LANDING GEAR ASSEMBLY AND TIRE APPEARS TO HAVE COLLAPSED. NO EVIDENCE THAT THIS WAS STRUCK WHEN PLANE TAXIED INTO DITCH.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

As a prelude, during each leg of this trip, I contacted flight services and maintained constant contact with air-traffic controllers, utilizing flight following.

I departed Norwood, Ma. airport (KOWD) ON Wed. 11/15/17 at 13:30 EDT. I arrived at Salisbury, Md. airport (KSBY) at 16:40 EDT. I spent the night in Salisbury, got a restful seven hours of sleep. I refueled at KSBY and departed 7:15 EDT 11/16/17. Arrived at Columbus County Airport (KCPC), N.C. about 10:00 EDT, refueled, snacked, rested and departed KCPC 11:00 EDT and arrived at Flagler Beach Airport (KFIN) in Florida at 13:25 EDT, where I again snacked and refueled.

Before departing KFIN, I called the Lockheed-Martin flight services [REDACTED] to determine weather conditions at my planned final destination, KSUA, Witham Field in Stuart, Fl. Flight services told me weather was marginal VFR at Stuart, but VFR at St. Lucie County International Airport (KFPR) in Fort Pierce, Fl. This airport is just 20 NM from KSUA.

I departed KFIN at about 1400 EDT, thinking I would stop at KFPR, if weather hadn't improved at KSUA.

However, about 40 minutes into my flight, weather conditions deteriorated, with the ceiling dropping to about 2000 feet, with moderate rain falling, hampering visibility. I alerted FAA flight following that I was going to turn back to the north and land at the nearest airport. They advised that KMLB (Melbourne) was just a few miles to my northeast. I contacted the tower and they gave me a weather briefing and, once I told them I had a visual of the airfield, they gave me clearance to land runway 9R.

I entered a right downwind to runway 9R, put down my landing gear and lowered flaps 10 degrees. Turned right base, check my "GUMPS" checklist (fuel setting, undercarriage, mixture setting, power-propeller and speed) and lowered flaps to 20 degrees. Because the winds were gusty, I decided to land a little faster than the preferred 75-80 mph. I touched down in the middle of the runway at 85 mph, lowered throttle to idle and retracted flaps.

Landing was about 100 feet past the threshold, but the only unusual thing I noticed was that the plane did not settle into a normal rollout. The plane seemed a little wobbly. Within a few seconds, the plane took a strong turn to the left, exiting the asphalt onto wet grass at almost a 90-degree angle. (It had been raining for at least part of the last hour.)

I applied only a light push on the brakes and minimal right-rudder pressure. My fear was that, being on wet grass, any drastic attempt to stop the plane or turn rapidly to the right could possibly topple the plane and cause extensive damage to the vehicle and serious injury to myself.

Ahead of me was about 30 feet of grass, followed by bushes and lots of skinny trees. My thinking was that the plane would be slowed dramatically by the bushes and trees and serious injury and damage would be avoided.

Unfortunately, there was a ditch (running parallel to the runway for at least a half mile that I couldn't see until I was just 10-15 feet away because it was bordered by tall grass. At that point, all I could do was brace for impact. I believe the plane plunged into the ditch at about 55 m.p.h. I was shaken by the crash, but felt no serious injuries. I turned off the master and kicked open the door and scrambled out, onto the wing and onto the higher ground.

RECOMMENDATION (How could this accident/incident have been prevented?)**Operator Owner Safety Recommendation**

I have owned this plane for seven years and never felt comfortable with the dedication or efficiency of the mechanics who worked on it. This past month was the latest example. Please allow me to explain.

This year, I was bringing my plane to Florida to have its annual inspection completed down South. Here's why. I had arranged for the annual to be done at KOWD. I contacted Jeff, the head mechanic, in September and then again in early October, telling him that I intended to fly to Florida the first good weather stretch after 11/15/17. Jeff, who works for Flight Level Aviation, took the plane in for the annual on Oct. 31 and promised to keep me updated on the progress of the annual. When I didn't hear from him, I went to their hangar on Nov. 7th. Jeff was not there and my plane appeared to be untouched. When I asked Lance and another assistant what was going on, they told me Jeff was away and would be back the next day. I asked what had been done to my plane. They said the oil was changed and compression checked, but nothing else. When I called Jeff the next day he said he had been delayed by extensive work on another plane and that my "plane would be next." That gave me less than a week to have the annual done, with little or no chance to take a test flight. I decided to arrange for the annual to be done at the North County Airport in Florida. I spoke to Matthew Hood at Lutech [REDACTED] My thinking was that I didn't want a rush job being done on my plane. (I had been dissatisfied with the previous annual. Despite my request in 2016, this company failed to repair my emergency brake. And before departing for Florida in 2016, after the annual, my flaps could go down, but not retract during my pre-flight. I had to wait two hours for them to apply grease to the flap mechanism.)

I felt safer flying a plane that I had no problems with prior to Nov. 15 -- other than the emergency brake that occasionally released on its own and I was always watching for it. I felt that there would be a better chance of it in Florida, where there would be no risk to complete the

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I believe the left landing gear assembly and tire failed. This is what FAA inspector Cheryl King first told me after her initial inspection.

Please see photos. There is no way that could have jammed upon impact with the ditch. There is no dirt or grass or any debris on it, as opposed to the damage to nose and front landing gear assembly.
