Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Landing gear, prop, cowling, wing, wheel right side

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Loss of directional control during landing roll out, ending in ground loop. Rolling over grass strip between runway and taxiway. Hit curb of taxiway approx 1000 feet from runway numbers. No injuries to pilot and passenger.

Weather was perfect, no wind during landing. Base and final leg were flown in a controlled and gradual descend. Normal touch down just after the numbers with normal speed. Normal landing at the beginning, then aircraft steered to the right. Pilot corrected to bring back aircraft to center of runway. Here the over correction occurred and ended in ground loop.

Pilot studied runway layout and arrival procedure for AZ82 prior to departure. AWOS was obtained around 5 miles out. Preferred runway is 21, which has been taken.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Avoid directional over correction on roll out.
