Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The helicopter was totaled. Aircraft came to rest against the leading edge of a wing on a Gulfstream.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was putting the helicopter on a trailer to tow for maintenance. As I attempted to land on the trailer the skids were not aligned evenly with the trailer. As I attempted the realignment of the skids? The left skid slipped off the trailer. The tail rotor made contact with the ground and I loss yaw control. The helicopter made multiple rotations to the right. At that point I was about 40 to 50 feet in the air the helicopter felt like it wanted to flip upside down. Cyclic inputs became so extreme I began to slowly lower the power. As I lowered power the helicopter became uncontrollable. At that point the main rotor blade made contact with the tail boom and chopped it in half. The helicopter came to rest on the leading edge of a Gulf Stream's left wing. There were no injuries.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Should have never attempted to land on the trailer. Or had an alternative method available.
