Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Prop , Fuselage , wings , rudder , elevator , aileron , landing gear All had bad damage. No property Damage.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

I was taking off on runway 18 at Mt Airy Airport. I was going to do a nose up take off , I pulled the nose up at about 20 mph and lifted off at about 40 mph. I held the stick back just a little to long and it started to tip stall to the left and I pushed the stick Forward to get out off the stall and I also give it right aileron and rudder because I was going towards the bank on the Left side off the runway , This slowed the plane down more and it came down and bounce on the right main wheel on the side off the runway. This give me more and I was still at full power. I flew on down the bank a distance till I thought I was OK. So I give it right aileron and rudder to get back over the runway. That is when the right strut caught the ground because when I bounced the right wheel came off. the nuts that were on the bolts were stainless steel and only had two threads in them. All four off them strip off the bolts when I bounced so when I went back up the wheel fell off. The front wheel had the same nuts on it so when the strut caught the ground pulled the front wheel down on the ground and they strip off the same way. The front strut dug in and flipped the plane over.

RECOMMENDATION (How could this accident/incident have been prevented?)		
Operator/Owner Safety Recommendation If I did not tip stall the plane it could have been Prevented		
MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)		
Was there Mechanical Malfunction Failure? ☒ Yes ☐ No <i>(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)</i> The nuts on the landing were not the right nuts. They should not have striped off like they did.	Total Time/Cycles On Part _____ Hours _____ Cycles Time Since This Part Inspected/Overhauled _____ Hours
