Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller curled and chipped off. Left landing gear cracked. Dent in left wing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Student pilot Ivan Romero was conducting a solo flight and practicing pattern work at Fullerton airport. He completed 4 successful takeoff and landings to a full stop on the dry asphalt. On the fifth takeoff, Ivan decided to practice a soft field take off technique. He applied back pressure and applied full throttle. As the plane naturally yaws to the left due to the left tuning tendencies, he did not add sufficient right rudder. The aircraft went off the runway Andrew propeller clipped the papi lights and went to a full stop between taxi way Charlie and alpha. Ivan then proceed to shut down and secure the aircraft as airport ops came to assist him.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

As his instructor, my recommendation to students conducting Solo flights would be to clearly state their intentions on the Solo flight. Ivan did not disclose to me that he was going to practice soft field take off and landings during his solo flight. If he had originally told me his intentions, I would have advised against it due to that being still relatively new to his training. Future student solos would have to be cleared with the instructor on exactly what he or she is conducting on their solo flight.
