Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The aircraft landing gear was damaged in the landing due to speed. After coming to rest on the runway it caught fire due to a broken fuel line. Most of the aircraft was consumed by the subsequent fire. The debris needed to be cleared from the runway and the runway was cleaned by a sweeper.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 1:40 PM I was departing Runway 20 at KSAC and intended to stay in the pattern to practice touch and go landings. After receiving clearance, I departed the Runway. I rotated and climbed to approximately 200 feet plus when I realized the canopy was not latched and was opening. I tried to hold the canopy down to re latch without success. I decided to abort the take off and land. I had too much speed and landed hard collapsing my landing gear. I slid down the runway and came to a stop. Upon coming to rest I saw that a fuel line had ruptured and shortly afterwards the gas caught fire. I immediately exited the aircraft. It eventually caught fire and was completely destroyed. The Fire department came and extinguished the flames. The Airport Operations personnel came out and supervised the wreckage removal after being authorized to remove it to safe storage. The debris was cleaned up and the runway swept for safety.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

If I manually checked the canopy after I latched it I would have discovered the latch did not catch. I also could have continued to climb into pattern altitude alerted the Tower of the situation and returned to Runway 20 on a stabilized approach. I did not do this because I was concerned about full canopy deployment.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

The canopy latches did not secure the canopy even though I deployed the locking t-bar.

My ATIS information was on my knee board and lost. The information provided was collected from other sources. I do not believe weather was a factor in this incident. I do not have the ELT information. I may be able to research information from the seller if necessary. My aircraft logs and information was destroyed in the accident. I obtained copies of information from the seller who performed the annual. Injury: My X-ray shows a small compression fracture at L-6. I have a follow up appointment with my physician in six weeks for my back to see if it is resolving. Other aircraft rating: There was no selection for weight shift aircraft. Please let me know if you need any additional information.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
