Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 2340 ZULU time we had landed on taxi way Papa after a short flight in the pattern. We taxied to the intersection of Papa and Lima facing west holding short of 30 right and requested to taxi back to the ramp. The tower asked if we wanted to air taxi to 702 helicopters. We asked again to Taxi, not air taxi. The tower asked us to Air taxi to 30 Left and then taxi into the ramp from there, we let them know we could not do that as a gyro copter. Tower asked if we needed to stay on the ground. We replied we could either ground taxi back or depart the taxiway and land on 30 left then taxi from there. Tower instructed us to do so. As we turned the aircraft back onto taxi way Papa, the wind caught the rotor, the blades teetered back and struck the empennage causing damage to the propeller as well. We shut down the aircraft to inspect the damage and then asked the tower to taxi back to the ramp. No one was injured and no other aircraft were damaged.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

We had anticipated the tower clearing us to taxi back to the ramp and were in the process of slowing down the rotors to do so. The tower not knowing the capabilities of the aircraft changed our plan and when turning back on the taxi way to comply with the request of the tower, the wind was able to teeter the rotor to the point where damage could occur. In hindsight we should have waited for the rotors to come to a complete stop and requested the tower to continue to taxi to the ramp. Better communication with the tower would also have been help.
