Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to right wing tip, collapse of right main landing gear and propeller strike.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 12/19/2017 at about 1400 hours I departed KDVT for a local flight. I returned to KDVT class D airspace at about 1455 hours.

At about 1510 hours I had successfully performed two "touch and go" landings on runway 25R at Deer Valley Airport (KDVT). KDVT Tower then cleared me to runway 25L for full stop landing.

The accident occurred during an attempted wheel landing on runway 25L.

On initial contact with runway, I experienced a slight bounce followed by main gear contact. After main landing gear touchdown and prior to tail wheel contact, a wind gust lifted the left wing. I applied left stick to keep left wing down and right rudder to correct adverse yaw and maintain directional alignment. The left wing settled and the nose of aircraft yawed to the right of centerline. Left rudder was applied to correct right yaw and aft stick as the tail of aircraft settled. The left wing of aircraft then abruptly lifted and the nose yawed to the left. I applied aft left stick and right rudder to correct but was unable to stop the continued left yaw/right roll of the aircraft.

The right wing tip contacted runway surface and the aircraft then departed the left side of runway 25L, causing additional damage due to the collapse of the right main landing gear.

After securing the fuel and mixture controls I contacted KDVT by radio and advised there were no injuries. I then secured the aircraft's electrical system and evacuated the aircraft. KDVT airport operations personnel and several individuals who identified themselves as FAA personnel contacted me almost immediately after I exited the aircraft.

Requested information and documentation was provided to FAA and KDVT personnel. At about 1800 hours "Aircraft Transport" of Phoenix Arizona moved the aircraft to hanger 2-8 at Deer Valley Airport where it was defueled for safety purposes and then secured at the request of FAA personnel.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Pilot must maintain control of the aircraft under all conditions. PIC should have initiated an immediate go around when bounce and wing lift was experienced during wheel landing.

Additional training in tail wheel operations. (In general and in specific make and model)
