Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Engin was torn off the airframe and destroyed. Left wing tip ripped from wing. Left wing seperated from rear spar attach point. Firewall and engine mount buckeled and destroyed. Fusualge was buckeled in aft tail section. Vertical stabilizer damaged due to impact. Light pole at accident site slightly damaged.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

On January 1st 2018 I flew from KEUL to KBYI to have coffee with some family friends. I knew i had to depart by 4:30 MST to be back to KEUL before dark. KBYI did not have a fuel pump on the airfield so I had to call a fuel service and wait for someone to drive accross town to fill my aircraft. I topped off the Cessna tanks at 22 gallons. This put me at 5:00 MST for departure from KBYI to KEUL. After departure it got dark and I became dissoriented and got lost south of the Mountain Home area over the desert with no light references to guide me. At this point I was lost circling for about an hour over the area trying to find something to use as a visual reference. My dad was able to use a tracking app on his phone to find my location and help guide me towards the Boise area. After becoming lost and panicked I finally reached the Nampa area and spotted a factory with smoke thinking it was the factory just East of the Caldwell Airport. The weather was clear with a light haze in the area. I then spotted what I thought was a lit runway the the West of the factory which had blue lights on top of the street lights, so I assumed they were the taxiway lights. I was on final starting my flair before I realized it was not the runway at KEUL. By this point it was to late and I struck some tree branches with my left wing. I had the wheels on the ground but the branched caused me to veer left and strike a light pole with the front engine. The accident occured at around 7:30 MST. After the accident occured I climbed out of the aircraft and went to the hospital to get checked for any injuries.
