Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left propeller separated from the engine. Left wing was damaged by lamp post. Fuel tank was ruptured

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I started to taxi with a 26 knot tailwind. There were several icy patches that I walked across to get to the aircraft. There were probably patches that I taxied across that may have interfered with braking. Immediately, I realized I was moving too fast and tried to brake and reverse thrust to slow down. I tried to turn to crosswind, but I wasn't able to tell if the park button boosted the nose wheel steering at all. The strong crosswind then forced the aircraft to the left off the airport apron. The left propeller struck a lamp post and departed the engine. The wing impacted the lamp post gouging the leading edge and damaging the fuel tank leading to a fuel leak. The fire department and airport manager responded quickly. I pulled the Stop and Feather Buttons and completed shutdown checklists. There was no evidence of fire, and I didn't realize there was a fuel leak until after I exited the aircraft. I called Salt Lake City Dispatch, Chief Pilot on Call and Maintenance Control. I was contacted by the NTSB duty officer who told me to expect investigators to call.
