Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

1. An airport taxi way location sign was damaged
2. Aircraft damage from our cursory view revealed 1. a blown left rear tire/rim damage; 2. collapsed nose wheel and landing gear and 3. subsequent damage to the props, potentially two engines and flaps. Final damage will be determined by an insurance adjuster.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

- cleared for a visual approach to runway 21 behind citation jet with a tower caution of possible wake turbulence
- the visual approach was normal and stable with full flaps and approximately 10 extra knots to compensate for possible turbulence
- the aircraft touched down normally right on the touch down zone of runway and started to roll normally down the center line for a short while.
- as the airplane decelerated I pushed the nose wheel down to the runway as per normal practice in this AC and started to apply light braking action
- at this point the airplane veered to the left of center line
- the application of right rudder had no impact on the lateral direction and the aircraft continue to veer left of centre line
- I applied right rudder with no effect and had no directional control of the aircraft
- it became clear we had a mechanical malfunction with either the left landing gear or a blown left rear tire
- The aircraft continue to veer left towards an airport taxi way sign to the left of the runway and it quickly became clear I would make contact with the sign
- As the aircraft approached the sign I pulled back hard on the control column prior to contact with the sign
- The front landing gear made contact with the sign and the ac stopped on the gravel area behind the sign
- the nose gear collapsed, the props hit the gravel and the airplane came to a stop on its nose.
- neither pilot was injured and we immediately performed a shut down checklist to secure the plane.
- emergency services were dispatched to us who checked the aircraft for evidence of fire
- both pilots declined any medical examinations

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

N/A. Experienced a mechanical malfunction.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)

Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No
(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

- The left rear tire blew on landing; the cause of which I do not know.
- the annual was recently performed and the brakes, and landing gear repairs had been completed just prior to this trip.
