Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

The aircraft caught on fire after a gear up landing - the aircraft was totally destroyed and minor damage to the runway surface.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Normal take off from MPO in return to FWN. Lined up on long Final to Runway 03 at FWN. I thought I put the gear down on Final and I experienced some turbulence on Final and could have accidentally put the gear up. I should have done another check on short Final. I made a costly mistake by not triple checking. Fortunately no one was injured.

To: Whom it may Concern

On January 21st at approximately 2:40am, I landed my 1964 Cessna 210 at Sussex airport on runway three with the gear up. Subsequently, the prop struck the runway, and immediately after, a fire erupted in the front of the cabin. Myself and my brother were both able to exit the airplane without hesitation. Neither of us sustained injury. The aircraft became engulfed in flames quickly. 911 was called and firefighters were dispatched to the scene in approximately 15 minutes. They extinguished the fire promptly. By that time the fire had completely destroyed the aircraft.

The flight preceding the gear up landing occurred and the end of an uneventful 18 minute flight from KMPO airport. I maintained an altitude of 3500 feet until beginning descent and deceleration at about 10miles from the airport. I visually located the runway at about 5 miles away. I approximately, 125 knots, I attempted to lower the landing gear. From my recollection, the green light illuminated. I extended the flaps to 10 degrees, 25 degrees, and full flaps on short final. I don't recall the green confirmatory light changing to red at any time. During my approach and use of the manual trim wheel, it is possible that I inadvertently cycled the landing gear back to a gear up position. My descent angle was typical as was my speed. Upon making contact with the ground, the aft portion of the fuselage appeared to make contact first, and subsequently, the prop struck the ground.

To whom it may concern,

I, Mark Stryjewski am writing to confirm that on Sunday, January 21st I was the passenger in a Cessna 210 flying with Marvell Scott as the pilot. At approximately 2:45am we landed the plane at Sussex airport and after the plane came to a stop we noticed a fire around the nose of the plane. We both exited the plane safely and walked down the runway far enough from harms way. I, Mark Stryjewski am was in no way injured during this event. I did not need to be seen by police or fire department personnel because I was injury free.

If you have any questions I can be reached at

Thank you,
