NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 8 Feb '18 I met with Joel Allen and Victor Baker (builder, previous owner of 7KJ) to do a thorough review of the Kitfox and prepare a detailed plan of action for Joel's transition training and tail wheel endorsement. We discussed the handling characteristics of this specific model Kitfox versus Joel's other machine (RV-7A) as well as typical tail wheel vs tri-gear issues. I then flew some airwork and patterns with Victor for familiarization with 7JK before beginning flight work with Joel. I had previous experience with both Victor (RV-7, 12 Oct '17) and Joel (RV-7A, 30 Aug '17) doing Flight Reviews with them. Joel already had some flight time in 7JK with Victor during purchase of the aircraft.

Ground handling and taxi on the way to the runway (27 from mid-field hangar) seemed good enough and I opted to have Joel do the takeoff. He had some difficulty tracking the runway immediately after takeoff and had a small excursion off the left side of the runway. I took over and returned us to the runway and completed a normal takeoff. We did standard airwork (turns, slow flight, stalls, etc.) on the way to KMEV for landing/takeoff work. Airwork all went well. Upon landing on Runway 34 we experienced a runway departure to the right and I took over for a "fly-out-of-it" recovery to a takeoff without incident. We then returned to KCXP for a detailed discussion of the events. Joel commented on the difference between Kitfox and his RV-7A takeoff and landing.

The next morning, we had another detailed discussion/review of Kitfox vs RV-7A handling and agreed upon a plan for the day. After a thorough pre-flight, Joel's foot work during taxi was accurate and confident. We then did 3 high-speed, full-length taxi runs on Runway 27, repeatedly reaching just short of full lift off and then slowing. They went well so we prepared for a normal 3-point takeoff. Joel requested a "hands-on" following during the takeoff which I attempted to do without actually "loading" the controls. The takeoff thru initial liftoff appeared normal, but just after that the aircraft began drifting to the right. I believe Joel applied left aileron for recovery but then noted a sharp turn to the right just off the ground, heading us towards the adjacent ditch. We then bounced off the ground between the runway and ditch. I attempted to use left rudder to yaw us at least parallel to the ditch while reaching for the throttle to attempt another "fly-out-of-it" recovery because we were about to impact the vertical wall of the ditch (too close, too fast to stop before doing so). I was unable to move the rudder pedal but did get the nose up enough that we avoided a direct impact on the ditch wall. We caught the top of the ditch with the main gear and were swung right, coming to rest heading east just on the edge of Taxiway Bravo. 7JK sustained substantial damage.

The following is a brief summary of my overall & related pilot/instructor experience.

Total of 15,320 flight hours since beginning flight training in December 1966. Of those, 8,135 hours were in SEL, all but a few hundred in tail wheel airplanes. Remainder in gliders and some hang/para gliders. Total flights just shy of 46,000 with at least 30,000 of those in SEL tail wheel tow planes (Supercub, Pawnee, Callair, Maule, etc.). Kitfox time estimated around 100+ hours including the one I owned and others I tested for builders and then instructed them in after completion of test requirements. Have given 6,150 hours of flight instruction (likely same # ground instruction) and recommended 142 successful applicants for pilot certificates (only 1 failure). Approximately 2/3 of all my flight activity occurred here in this area since I took early retirement from the "Real World" (aerospace/defense, mostly management roles) in 1996.
