Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Fuselage crushed, and landing gear folded (Tried to select "substantial" above, but unable)

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The day prior to the accident 2/8/18 Mike Moore (CFI) and the previous owner of the Kitfox went on a few flights to get Mike comfortable in the aircraft. Then Mike and I took the Kitfox out for instruction and transition training. On the runway for takeoff when the tail lifted, I was unable to keep the airplane on the runway, it veered off to the left. Mike took the controls and was able to get the plane back on the runway for a normal takeoff. We did air work at a safe elevation, then set up for a landing at KMEV. After touchdown, the plane ran off to the right side of the runway. The landing and takeoff is very different than the nose wheel RV I am used to. Mike took over the controls, and we were able to take off again without incident.

We had a detailed debriefing, after the flight, and prior to flying the following morning. The morning of the 9th, we did several taxing tests at increasing speeds to get me comfortable with the ground handling. Just prior to the accident, we lined up on 27 for a normal takeoff. I asked Mike to keep his hands on the controls because I still was not comfortable with the planes takeoff handling. We were able to perform a normal takeoff, but after leaving the runway, the plane was drifting to the right. I corrected with increasing aileron input. After a few seconds, we were losing elevation, and continued drifting to the right. We impacted the dirt to the north of 27, and then hit the drainage ditch between the runway and taxiway causing substantial damage to the aircraft.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

The impact with the ditch between the taxiway and runway caused a majority of the damage. If we impacted the ditch a little lower, I feel the damage and injuries would have much worse. I would like to see the drainage ditches filled in to help prevent future injuries.
