Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Nose wheel gear bent
 Prop bent

NARRATIVE HISTORY OF FLIGHT (Place type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

See Attached

Course of events:

The flight was as expected and no abnormal situations. Approached Runway 3. Had runway in sight. Normal prelanding checklist checklist and procedures full flaps. Touched down the first third of the runway at 120mph. On center line. Flared at touch down. Power out. Light brakes use. I decided to let the airplane roll to the end of the runway because I was slowing down. So I didn't have to use brakes excessively. As I put in left rudder and pedal to start left on to taxi way (pretty slow, less than normal speed for this situation) I noticed the brakes were not being effective and it began to pivot to the right. I felt the right main slide the runway then the nose. Finally began to feel the pedal inputs to take effect and the airplane move back to the left but then nose wheel bumped and folded. I shut down everything once stopped and evacuated.
