Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller Strike

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Purpose of flight was solo pattern work at KLAL. Weather briefing obtained from ATIS before take off and winds were at 340/10 gusting 15. After take off and once established on the downwind for runway 27, received a weather update. Once turning into final the winds got very powerful and felt like the aircraft would flip because of the powerful winds and called it to a full-stop as I knew the winds are too strong and out of my capacity and personal minimums, tried my best to fight it and had a stabilized approach but when I got to short final my airspeed increased and still a very heavy and powerful crosswind that was very hard to fight but I was focused on taking it to the ground as safely as possible, I was focused on taking it to the ground and came in flat as I touched down I bounced a couple of times and a rough landing without knowing I damaged the aircraft and taxied back to the academy ramp unfortunately finding out I damaged the aircraft.
