Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Aircraft destroyed. Left wing sheared off by tree, impact with ground bent fuselage/firewall, seperated top deck frame and left side of cockpit area.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Please see included email/attachment.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

~ Taking a broader view of the terrain and wind direction as it pertained to the terrain prior to starting the final approach. The interaction of wind of this force, while steady and easily workable at other locations, created a hazard at the approach end due to surrounding terrain and gusts created.

~ Although I used an indicated approach speed of roughly 1.6 VSO, an approach speed of perhaps 1.7 VSO with a touch down point 1/3 of the way down the strip may have overcome the wind issue.
