Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

air craft nose planted breaking off front wheel and bending prop flipping over on its top causing structural damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We arrived at County line air strip at approximately 3:30 pm. it was a clear day with a 12 mph west wind with 10 mile visibility. we visually inspected Air Craft for Purchase. Ward Astin and my self did check list walk around. inspecting fuel sumps on each wing and engine pulling sample on each. the plane had 30 gal of fuel 15 gal on each wing with capacity of 19.5 on each wing. we ran up the air craft for approximately 30 min before taking off. we pushed rpm to full capability of air craft while checking breaks. did carb heat and mag test along with ailerons and rudder. we took off at around 5:00 pm using most all of airstrip rotating at 60 mph we took off being airborne for approximately 9 seconds when engine failed dropping rpm to an idle the prop was still rotating but we had no power we landed in cotton field north of air strip when front wheel set down it dug in ground causing air craft to flip on its top breaking off front wheel and nose planting bending prop and flipping.

RECOMMENDATION (How could this accident/incident have been prevented?)															
Operator/Owner Safety Recommendation im still not sure what happened the air plane had just went through a pre purchase inspection that previous week. as far as i knew the plane was in good shape having the annual in august it has very little time on it from annual date. I dont want to speculate what went wrong im not sure other then it seamed it was starved for fuel. i don't know how we could have been any safer then we were. the plane was ready to fly by all indications.
