Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to Landing gear, lower boot cowl, and Muffler pipes at the time of the incident. More damage to the aircraft occurred on the movement from the grassy area when loading onto the recovery truck. More damage to landing gear, wing and cowlings and belly longerons.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

At the time of the incident weather was: no winds and unlimited visibility, smooth air and dry runways. We flew multiple takeoff and landings at Skagit airport, refueled and headed back for Lopez island, with a planned full stop landing at Anacortes.

At approximately 4:15 PM PST, Approach and touchdown at Anacortes was uneventful until the tailwheel contacted the runway. At that time the aircraft veered to the right and I was unable to correct the direction prior to the right landing gear leaving the tarmac and effectively ground looping the aircraft.

The side loads of the aircraft caused both gear tubes to tear from the pivot assembly and collapse. The aircraft gently came to rest on the grass between the runway and taxiway. All 3 occupants exited normally. No one sustained injuries of any kind.

After exiting the aircraft, we quickly inspected the aircraft. Damage to the aircraft appeared to be minimal at the scene. The prop appeared to be untouched, except faint dirt stains on the tips, no indications of stress or deformation.

Fabric appeared tight, with the exception of some deformation on the flaps.

Minor damage to the lower cowl skins were aparent when removing the cowl top and sides for recovery. firewall and all inside the cowling appeared intact.

During the recovery process, removing the aircraft from the area between the Runway and taxiway, so the runway could be re opened, the aircraft received substantial damage to the underside, while winching it onto the recovery vehicle.
