Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Right and left wings, tail, propeller, wind shield, and fuselage damage on right and left sides.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 03-18-2018, I, Jeff Hass, departed F05 in N1103F, a Cessna 172 Skyhawk. I took off at approximately 9:45 PM on runway 20. At the time of take off, the wind was blowing at 210 degrees at 13 knots. Strong winds were forecast to arrive at approximately 3 AM. I stayed in the Vernon pattern, and conducted two touch-and-go landings and takeoffs. When I was in the pattern for my third landing, the wind speed increased. I rechecked the AWOS. The wind was still at 210 degrees but had increased to 18 knots, gusting to 21 knots. As I was about to make my third landing, I experienced moderate turbulence while on final. I applied full power and went around the pattern again. When I made my third landing, I touched down just past the 20 runway number markings. As I was landing, the wind increased and shifted to my right. The unexpected shear was beyond the aircrafts limitations and resulted in the aircraft coming to rest inverted in the grass area between the runway 20 and the taxiway.
