Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Propeller ruined, Engine will need to be broken down to check for damage, Underbelly of aircraft badly skidded, possible damage to cowl flaps.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Had flown non stop from KCVG to KCRG for 6.0 continuous hours, was stopping at CRG to refuel. remaining flight time to F45 would have been +/- 1.5 hours. Was fatigued at reaching CRG and anxious to get out of the plane. Called CRG tower for landing clearance was warned of 2 other aircraft in pattern, turned inbound for the field at about 5 miles. Was able to spot 1 - 172 on base leg, could not see other 172. Began search of pattern for 2nd 172. Set 10 degrees of flaps and began decent by powering back. Never could pick up the second plane. There was no visible traffic ahead on the runway. Continued straight in. At about 100 ft AGL, tower called for a go around. Said " Make an immediate turn and begin climb to pattern altitude" I had no idea where the second plane was and thought it dangerous to climb back into the pattern without traffic knowledge, Tower never mentioned that the gear was still up. I made a decision to continue straight in because plane was so far committed on airspeed and sink rate. Never did a final "Gump's" check because if the distraction of the second plane. Landed gear up on the planes belly. Plane remained upright and in a straight line.

RECOMMENDATION (How could this accident/incident have been prevented?)															
Operator/Owner Safety Recommendation 1) More attention by pilot to landing check list and plane configuration. 2) Divide the total trip (8 hours) at a half way point to refuel instead of a long leg (6 hours) and a short led (1.5-2.0 hours) 3) Tower controller giving a more specific instruction such as "Gear still Up" or "Check gear down"> then I would have climbed straight out till the gear was down and then rejoined the pattern.
