Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop strike, Right wing spar bent or detached at root. Left main gear broken off.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I wanted to get in some landing before dark. Remained in the pattern at 5M0. Winds calm. Did three three-point landings without incident. I had not practices wheel landing since November. Attempted a wheel landing. Kept power on and aircraft flying just above runway for about 1000 feet. Touched-down after about 1000 feet. Cut power after touchdown. Kept tail up. Aircraft began to drift to the left while the tail was still up. Attempted right rudder, but no effect. Went to full power too late. Aircraft was already too close to the left side of the runway. Felt an impact soon after leaving the runway. Apparently the right wing struck terrain. I was not aware of the ditch east of the runway. Aircraft stopped nose down in the ditch.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I should have kept the tail higher in the air stream. It may have been shadowed by the wing. Should have applied power sooner.

I should not have attempted a wheel landing without an instructor since i have only limited experience and it had been 4 months since I had practiced with an instructor.
