Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage was confined to aircraft. Wheel came unwelded at the bottom of landing gear leg, and skidded down the runway until it caught the dirt on the edge of the runway. Then the aircraft was spun around 180 degrees. Prop strike.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Bob Saum Statement

Crash Date: April 6, 2018

Certificate Number: [REDACTED]

I took off from Caldwell Airport (KEUL) with two full tanks of fuel. I flew to Sunrise Skypark (ID40) and landed. 30 minutes later, I departed with a passenger, Doug Owens. We flew for 30 minutes over the Owyhee Mountains. We returned to the Skypark and landed. Two hours later, I departed from the Skypark with a passenger, Mike Brinker. We flew in a formation flight with a RV8. We flew towards Caldwell. Half way to our destination, I was flying lead. I then relinquished lead to the RV8 and entered Caldwell on the overhead runway 1 2. As I got in the overhead pattern, there was another airplane that was just turning base. That put me number three to land. Number one landed and turned out and cleared the runway for number two to land. Number two landed and took the first exit. As I prepared to land, approximately 200 feet past the numbers 1 2, I touched down with a bounce, one time. I did not feel comfortable with the landing, so I applied more throttle to let the airplane settle back down. When I touched down again, I didn't realize there was a problem until it dropped on the left. This caused the airplane to suddenly go out of control with the propeller striking the runway and the dirt. This caused us to go into a spin and a nose-down position. We came to a sudden stop at the 3,000 foot marker of a 5,500 foot runway. I immediately checked on my passenger to determine his condition. Then, I called on the radio to report my accident and to get the runway to close. I then shut the gas and the master-switch off and my passenger and I exited the plane. We were both shocked, because we didn't know what had happened to cause us to crash. We immediately noticed that the left wheel and tire was behind us on the runway at approximately the 2,000 foot marker.
