Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Aircraft ground looped to the left. Right gear collapsed. Examination showed a crack 1/3 of the way around right gear leg just above the weld on the axle which had rust in the crack. ~~Left wing~~ Right wing bent 3' from tip.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

~~I had just touched down making a 3 point landing when the airplane made a sudden left turn and ground looped.~~
 I had purchased this old Luscombe from the sister of my old flight instructor who had recently passed away. I had it annulled in Holstead, KS. I departed SNO at 10:00 AM that morning with planned fuel stops in Fairview, OK, Wilbarger, TX (FOS), with my destination being Brady, TX (BBD). Turbulence was moderate to severe once airborne. Landing at Fairview was uneventful. I bought fuel and departed at approx 12:50 PM. Between Fairview and Wilbarger/Vernon, I as a glider pilot took notice of many strong dust devils along the way, some strong ones south of Altus, OK. At the time of landing in Wilbarger, ^(FOS)ALVOS was reporting 220 degrees at 5 knots. I made a normal 3 point landing. Almost immediately after touching down, the airplane took a hard left turn which ended up in a ground loop. Due to a crack later found in the right gear leg, the ~~right~~ right wheel broke off collapsing the gear and bending the left wing. Locals on the airport told me I likely encountered a dust devil ^(summit) on the runway as a C172 was destroyed a couple weeks earlier. The Luscombe came to rest 180° opposite of landing direction in the grass off the east side of the runway.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I'm not sure what I could have done to prevent the accident given how suddenly it happened and the crack in the gear leg. However, just to be sure it wasn't my tailwheel technique, I will not fly another tailwheel aircraft until I have received some refresher instruction in tailwheel airplanes. It was an embarrassing, humbling event that I intend to never repeat.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

When loading the airplane on a trailer to move to storage, we noticed there had been a large crack in the right gear leg, just above the weld to the axle. 2/3 of the break showed fresh metal, the other 1/3 was rusted and corroded.
