Description of Damage to Aircraft and Other Property <i>(Use additional sheet if necessary)</i> Left wing collided with steel lighted sign pole. Left wing leading edge damaged approx 5 feet from wing tip. Rib bent. Rear carry-thru spar is bent.		
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink)</i>		
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.		
After landing at Ryan I went to park the plane at the ramp and this is what happened. At first, I wanted to park the plane directly into the ' _ ' parking marking. Then I realized that I couldn't make it on the one I wanted to so I chose the second one. I aligned myself with the second one, added some power to make my turn, and then I heard a 'boom'; I decided to shut down the plane and checked what happened. I looked on the left wing and realized that my left wing had hit a pole. When the instructor came to Ryan to pick me up, we realized that I had also hit the temperature probe. The mid-left wing has a deformation and the temperature probe is a bit bent.		

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Adherence to company policies regarding shutting down on yellow centerline and pushing back into every parking spot. Upon interview with crews, it appears that this policy is not understood by instructors, who have been demonstrating incorrect parking methods to students. This student was previously shown incorrect parking methods by his instructor, which led to this occurrence.
