Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Broken rotor and propeller. Damaged tail section. Scratched left door and small part of the left side of the cabin frame.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Just after 1:00 PM I decided to leave the fly-in and taxied to take off on runway 34.

Weather was clear with strong winds from the North: 20 knots with gusts over 25.

I held short at 34 until an RV landed, then started to move, slowly, toward the center of the runway. Before turning right and positioning the gyro on the 34 centerline, a strong gust tilted the gyro to the left enough for the rotor (it had just started the pre-rotation and was slowly turning at about 50 rpm) to hit the ground on my left side.

That generated the accident that, in about 3 seconds, damaged rotor, propeller, tail and other components. The gyro rested on the left side and I exited, after turning the master switch off, from the right door, now above me.

I had no physical damage of any kind. Nobody else was effected.

No fire. No parts were thrown anywhere.
